

# DUAL APPLICATION PROXIMITY & DIRECT CONTACT

## Analog Voltage Detectors

VDAO40P and VDAO40C Analog Voltage Detectors (0kV-40kV)

- Detects 0 to 40kV line-to-ground (0kV to 69kV phase-to-phase)
- Easy-to-Read Analog Scale
- Test Capacitive Test Points
- The Detector Indicates Line-to-Ground Values for Nominal or Induced Voltages
- The 5-position Selector Switch is Calibrated for Height above Ground to Compensate for a Capacitive Coupling Effect.
- Shielded to Minimize Stray Field Interference
- For Your Safety, the Detectors Include Overload Protection up to 500kV
- Internal Backlight Available for Night Use
- 15kV/25kV/35kV Bushing Adapters are Available for Underground Use up to 35kV
- Water Resistant, and a Strong Construction Designed to Withstand Wear
- Contained in a Highly Durable Carrying Case with Interior Cushioning

### Model P also features:

- Proximity or Direct Contact Meter on Overhead and Underground Systems (P)
- Detect Voltage from the Ground on Bare Overhead Lines when Hand Held (P)
- Test Secondary Voltage on Bare or Insulated Cables (P)

**Made in the USA and  
Serving the Industry Since 1986**

under US Patents #5,950,954 #6,275,022, #6,459,252  
#6,617,840 #6,734,658 #6,753,678 #7,109,699 #7,336,063  
and other patents pending
